Mohamed Fazil

AI Engineer

mfazil2409@gmail.com | 0558637400 | Dubai, UAE | linkedin.com/in/mohamed-fazil24 | github.com/Fazil-24 | Portfolio

Professional Summary

AI Engineer with 4+ years of experience building production-grade AI, automation, and cloud-native solutions using Python, APIs, LLMs, and machine learning. Experienced in developing workflow automation, agentic systems, and decision-support tools that improve operational efficiency, with growing focus on applying AI and orchestration to agentic workflows, incident response, and security operations. Strong background in scalable backend systems, cloud platforms, and cross-functional collaboration in fast-paced enterprise environments.

Skills

Languages: Python, JavaScript, TypeScript, C, C++, HTML

Technologies & Tools: React, Machine Learning, PyTorch, TensorFlow, Azure, AWS, GCP, IoT, SQL/NoSQL, Figma, Docker, Agent development, Generative AI, LLM, RAG, LangChain, LlamaIndex, LangGraph, Hugging Face Transformers, Vibe Coding, Context Engineering, GraphRAG, SLM, Node.js, Express/FastAPI, REST APIs (OpenAPI/Swagger), JSON, Webhooks, Observability tools, CI/CD, Claude, Cursor, Uipath, n8n, ONNX Runtime, TensorRT, MLFlow, vLLM, DeepSpeed, Weaviate, Instruction tuning, LoRA, QLoRA.

Work Experience

AI Engineer, Alba Corp, Dubai **Sept 2026 - Present**

- Orchestrated a complex production workflow of autonomous calling agents for lead nurturing, integrated with CallGear, ElevenLabs Agents, Twilio, n8n, Odoo, and Supabase reducing leads going cold by **90%** and delivering an immediate business uplift.
- Built multiple vibe-coded web apps for business operations Logistics, Facilities, and a Client Portal and shipped at rapid pace by following harness engineering practices.

AI Engineer, Unisys **Sept 2022 – Sept 2026**

- Created an Agentic AI Solution for contract analysis and summarization, saving up to **1.2 M USD** of the procurement team's budget per year.
- Re-engineered a solution to identify defective batteries in manufacturing plants using Amazon Lookout for Vision, boosting ROI by **50%** more than planned.
- Worked on a multi-errand route optimization project for field service workers, developing custom algorithms for task-based planning integrated with mapping; designed and deployed a production-ready LLM application.
- Worked with different functions and business units within Unisys (HR, Finance, Legal, Marketing etc). Led ideas brainstorming, design, and rapid prototyping/PoCs for use cases.
- Developed a Finance AI Reconciliation Bot with Azure Document Intelligence and Azure Foundry Projects to identify the data discrepancies and Account statements validations.
- Developed Claude skills for the various report analysis and document generations across the company.

- Automated mail automation, word automation, and intelligent document processing, leading to an **85%** reduction in the team's manual effort.

Projects

- **Tender Evaluation Agent, (**In progress): UAE government tender evaluation & compliance. Ingests an RFP and vendor bids, checks mandatory compliance, scores bids against evaluation criteria with cited evidence, flags risks, and drafts the evaluation memo; procurement officer approves or overrides every judgment.
- **SkyRec:** Multi-agent airline disruption-recovery system (agentic architecture + MCP, Gemini API, Streamlit) that re-books and re-routes affected passengers automatically, cutting manual recovery handling time by **~76%**.
- **RenoAgent:** n8n-based agent that audits and negotiates renovation vendor quotes end-to-end research, compliance/scope checks, scoring, and a human-in-the-loop approval gate cutting quote review time by **95%**. (Cerebras API, SerpAPI, Gmail OAuth2, Google Sheets)
- **AlertX:** Agentic incident-response system for infrastructure and disaster resilience, built on IBM watsonx.ai and IBM Orchestrate with multimodal LLM input.
- **Venture Pilot:** Agentic automation platform that takes a new business from idea to launch live market/competitor/regulatory research (Perplexity Sonar API), automated compliance form-filling and submission, and supplier/inventory onboarding in hours instead of weeks.
- **Lookate:** Contextual place-discovery app with image-based search and a to-do list that syncs to a smart map for trip planning. (Foursquare API, OpenStreetMap, Gemini)

Education

Visvesvaraya Technological University **Aug 2018 - July 2022**
B.E. in Electronics and Communication Engineering *CGPA: 8.80/10*

Achievements and Certifications

- **Published patent**: Intelligent Pothole Detection for Roads using Computer Vision.
- Published research paper in IEEE: “Edge Driven Biometrics and Facial Recognition for Virtual Assistant”.
- Multi-cloud certified: **Microsoft Certified Azure AI Engineer, Agentic AI Business Solution Architect**, **Microsoft TITAN**.
- TIBCO Global Hackathon Winner. IBM Call for Code Global Runner-up. Intel OneAPI Hackathon National Champion.
- Skillsoft certification: completed a 12-month course on “**Delighting Customers with Design Thinking**”.
- Community contributor: tech talks, workshops, blogs, and mentoring.
