Professional Summary

Innovative Full Stack & AI Engineer with 3+ years of experience designing, building, and deploying production systems in enterprise environments. I have shipped end-to-end web applications, REST APIs, and cloud-native services while integrating AI features (LLMs, computer vision, optimization) to solve real business problems. I collaborate closely with product and platform teams, follow engineering best practices (testing, CI/CD, secure coding), and enjoy working on mission-critical systems at scale.

Skills

Languages: Python, JavaScript, TypeScript, C, C++, HTML

Technologies & Tools: React, Machine Learning, PyTorch, TensorFlow, Azure, AWS, GCP, IoT, Figma, Docker, Agent development, Generative AI, LLM, RAG, LangChain, LlamaIndex, LangGraph, Hugging Face Transformers, Vibe Coding, Context Engineering, GraphRAG, SLM, , Node.js, Express/FastAPI, REST APIs (OpenAPI/Swagger), JSON, Webhooks, Observability tools, CI/CD, Claude, Cursor, Uipath, n8n, ONNX Runtime, TensorRT, MLFlow, vLLM, DeepSpeed, Weaviate, Instruction tuning, LoRA, QLoRA, Quantization, Robotics, Physical AI, CUDA, HPC, GPU, AutoGPT, Databricks, ETL Gradient Boosting, PII handling,

Work Experience

Unisys

AI Engineer

AI Practice Team, Enterprise CTO

Sept 2022 - Present

- Created an Agentic AI Solution for contract analysis and summarization, **saving up to 70k USD** of the procurement team's budget per year.
- Worked on a project developing a conversational Interface using Azure OpenAI for frontline workers, **improving overall efficiency by 82%**.
- Worked on multi-agent project for emergency disaster response leveraging vision models and agents with autonomous calling.**
- Re-Engineered a solution to identify defective batteries in the **manufacturing plants by leveraging Amazon Lookout for vision**, which boosted ROI by 50% more than planned initially.
- Worked on **Multi-Errand Route optimization project** for field service workers by developing custom algorithms for task-based planning integrated with the Map. Designed and deployed production-ready LLM application.
- Led various projects in BFSI for document processing and Account reconciliation bot and helped the team by organizing workshops, customer sessions and co-led various programs to help increase the visibility and customer portfolio.
- Integral part of the core team, working on projects like **Hyper-personalization, Digital Twins, and Machine Learning**.
- Automated time-consuming tasks, such as **mail automation, word automation, and intelligent document processing**, leading to a **90% reduction in the team's manual effort**. Enabled the team to focus on more critical tasks.
- Focused on ideas brainstorming, designing, and developing rapid prototypes and PoCs for client use cases.

Education

Visvesvaraya Technological University

B.E. in Electronics and Communication Engineering

Aug 2018 - July 2022

CGPA:8.80/10

Achievements and Certifications

- Published patent:** Intelligent Pothole detection for Roads using Computer Vision.
- Published Research paper in IEEE:** "Edge Driven Biometrics and Facial Recognition for Virtual Assistant".
- Multi-Cloud Certified:** Microsoft Certified Azure AI Engineer, AI Fundamentals, Google Prompt Design in VertexAI.
- TIBCO Global Hackathon Winner. IBM Call for Code Global Runner-up. Intel OneAPI Hackathon National Champion.**
- Skillsoft Certification:** Completed 12 months course on "**Delighting customers with Design thinking**".
- Community Contributor:** Tech Talks, Workshops, blogs and mentoring.
